

Last Orientation for 4TH Year Students, ITM 4541 Internship in Tourism Management

Time flies fast. Our 4th year students just came back from a 4-month long internship, during which their ability in handling unfamiliar situations from working and living away from home and the university, and of course, from friends, has been proven, and higher capabilities would be produced. Last Friday marked another step of their real life to begin. The morning session was completed by all students sharing what they had been through during the internship, opportunities they got and problems challenging them to overcome. All well done on your part! You show us you are growing intellectually. Hope all of you succeed in your life and work in the future 😊:)
