

## Field Trip to National Museum in Bangkok

Our field trip on the 7<sup>th</sup> February 2019 was a part of the 'Cultural Tourism Management' unit. The students from the Tourism Management year '60, visited the National Museum in Bangkok, which houses the largest collection of Thai art and artifacts of the country. The highlight of The National Museum Bangkok is a funeral chariot hall featuring carriages used for royal cremations and many related examples of Thai architecture. Special thanks must go to the guest speaker of the museum, who provided the knowledge and in-depth details about the extensive collection of Thai art and artifacts. Our students enjoyed the experience and learned so much about Thai art and culture.
